### Departure

Take the bus from Brique to Tähischnu. The Stigwasser Bisse begins between Tähischnu and Mund, about 200 metres below the the hairpin bend in the road between the two (sign-posted).

### Itinerary

Follow the bisse to where it takes water following the beautiful river in the magnificent little valley as far as the Bisse de Wyssa (about 300 metres difference in altitude) At the start of the Wyssa Bisse there is a cross and it is clearly indicated. At first it crosses pasture pastures before following the vertiginous walls. The route is intersected by numerous tunnels. During the climb you cross the route of the Wässerwasser Stollen that can be used by people who are prone to vertigo. For this itinerary, after just over a kilometre you will reach a tunnel of one kilometre in length. This tunnel is lit but we advise taking a pocket lamp. On exiting the tunnel, you can follow the path of the bisse which flows in the open air well above your starting point. Follow the bisse along the road as far as the first junction. From here, follow the sign-posts to your starting point (towards Mund, Roose, Dichtuhüs) on a good path across meadows.
